SUMMARY

An imaginative and enthusiastic web developer able to design and build a website from ground zero. A striving to improve and learn new things individual with experience in HTML, CSS, JavaScript and Adobe Creative Cloud.

WORK EXPERIENCE

Seasonal Beauty Advisor — L'Occitane en Provence
London, Ontario
October 2022 — January 2023

- Accountable for navigating customers through the store and attending to their needs with a positive attitude and personal approach.

- Assisted customers through checkout with accuracy.

- Worked with a team to ensure the best customer experience, replenish items, reorganize the store for special events and solve problems in a professional manner.

PROJECTS

Avocado Music Mixer: HTML, CSS, JS. This project was created in collaboration with a partner who designed the wireframes for the website and created the SVG icons. Music Mixer is a dynamic, visually appealing website which allows a user to create their own music by mixing various audio tracks.

Chat Application: HTML, CSS/SASS, Javascript, Vue.js, Nodejs, Socket.io. The application built using a Socket.io Library for communication between a client and a server, which allows users to login into the chat room and write messages to those present in the room. When a person enters or leaves the room, the message about it is broadcasted to everyone.
